

IF YOU CAN DREAM IT. WE CAN BUILD IT.

PRODUCT: FOSSILCRETE NATURE'S PALETTE

CODE: WHITE (AND COLORS)

TYPE: ACRYLIC COPOLYMER EMULSION

PRODUCT DESCRIPTION: Fossilcrete Nature's Palette is a low sheen acrylic product, richly pigmented, and designed for use over new and old, properly prepared concrete surfaces. It is supplied in a variety of colors and may be tinted with universal tinting systems.

USES: May be used on concrete decks, floors and walls. May also be used for sealing heavy pores in concrete blocks. Nature's Palette may be used for previously primed wood and previously primed metal surfaces.

SURFACE PREPARATION: Surface must be clean and free of oil, wax, grease, dirt and sanding dust. Sand any previously coated surface before application. Remove all dust with a dust cloth.

APPLICATION AND CLEAN UP: Apply with paint roller, nylon brush or airless spray equipment. All surfaces to be coated must be cleaned and free of dirt, oil, wax or loose concrete. Old concrete surfaces must be water-blasted and cleaned with a good mildewicide (TSP) before application. If more sheen is desired, a water-based acrylic may be used to clear coat the surface. New concrete should be cured (28 days) and etched before application. All wood and metal should be previously primed. Clean tools with soapy water immediately after use. Rinse well with clean water.
